Freddy Products Ltd

Drum Top Vac 2

Drum Top Vac Air Operated

Drum Top Vac 3

The **Freddy Drum Top Vacuum** can be fitted to any 205 ltr drum, making it ideal and highly effective for collecting bulk waste, including swarf, wood, plastic, and with the optional Wet Float Assembly, liquids too!

Designed and built to work in even the most arduous environment, the Drum Top Vac will continue to perform where other vacuums are not powerful enough for the task.

Available with 2kw and 3kw motors, in voltages 110v or 240v, or you can even specify a powerful air option.

Simply drop the barrel into the Heavy Duty Castor Base, then place the Drum Top of your choice on the barrel, add the appropriate tool kit, and you are ready to go!

For very dusty applications, we offer a Drum Top with an Electric Filter Shaker. Pressing a button starts a motor which shakes the filter assembly clear of any heavy build up, the debris dropping down into the drum, and ensuring no tail off in the machines performance. The filter it contains is capable of filtration down to 1 micron.

Freddy also offers a Drum Top that conforms to HEPA certification, and thus filters to an efficiency of 99.997% at 0.6 micron.

For more information on any of our Drum Top Vacs, or if you have a specific need you wish to discuss, please contact us on customerservice@freddy-products.co.uk
